

### Writing Quality Quiz - Follow-Up

Below is an example of how someone might explain the rating/ranking of the two responses.

---

Response A is superior because it presents the reasons the Roman Empire was great in a logical way and does not make some basic grammatical errors.

Response B contains many errors such as incorrect tenses, wrong form of "it's/its", incorrect spellings, incomprehensible word ordering, and some strange word choices. Anyone who reads response B would be caught up on one or more of these mistakes.
